LGH-RVX Series

A commercially oriented system that can be used to deliver high performance and functions virtually anywhere.

LGH-RVXT Series

Thin, large airflow models of the LGH series that deliver high performance and functions.

GUF Series

Heat recovery units with a heating and cooling system that uses the City Multi outdoor unit as a heat source.

Dx-coil unit (GUG Series)

Temperature control equipment that works with Lossnay units and Mr. Slim outdoor units.

VL-CZPVU Series

Vertical type for residential use centralized ventilation with sensible heat exchange.

VL-220CZGV-E

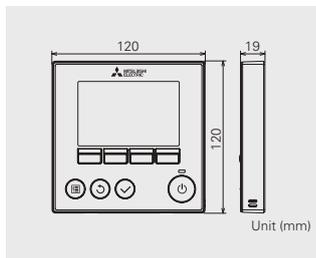

Centralized ventilation with sensible heat exchange, for residential use.

VL-100(E)U₅-E, VL-50(E)S₂-E, VL-50SR₂-E

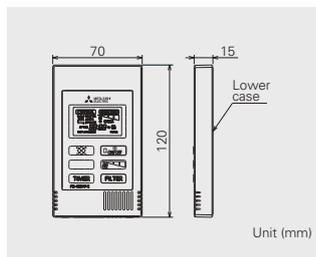

Wall-mounted models. Particularly suitable for houses and small offices.

REMOTE CONTROLLER

LOSSNAY

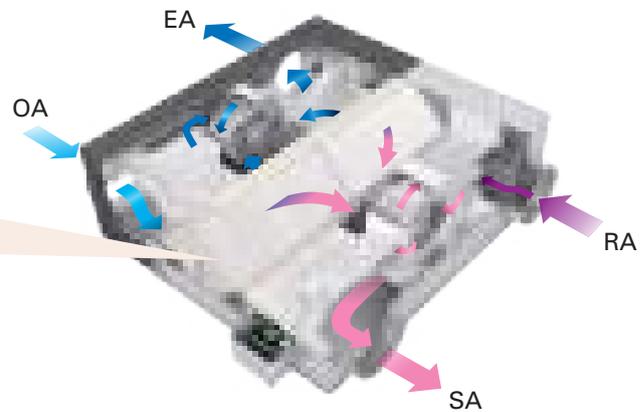

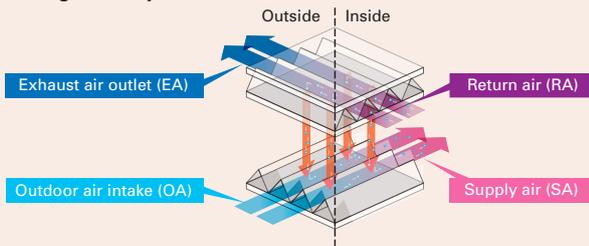

Lossnay ventilation systems are renowned industry-wide for their efficiency. They offer environment-friendly energy recovery and humidity control, and enable air conditioning systems to simultaneously provide optimum room comfort and energy savings.

Indoor Air Quality Inside a Building is Optimized Through Temperature and Humidity Exchange by Lossnay

Lossnay is a total heat exchange ventilation system that uses paper characteristics to perform temperature (sensible heat) and humidity (latent heat) exchange.

● The concept of sensible heat and latent heat exchange using Lossnay core

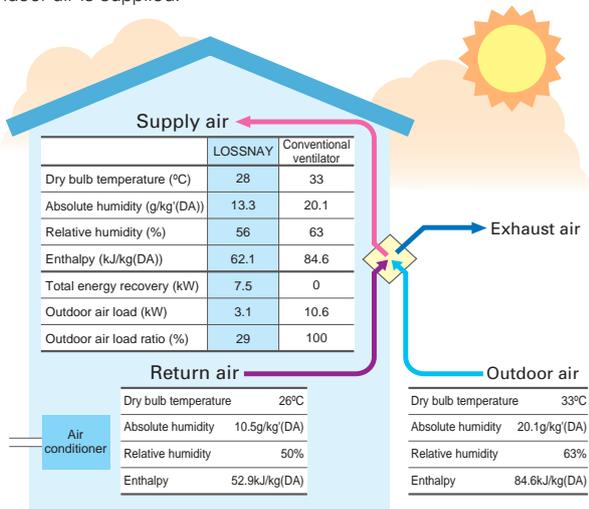

What Can Be Improved by Introducing Lossnay?

● Ventilation with maximized comfort

In summer

Air similar to the conditions of cooled (dehumidified) indoor air is supplied.

Heat recovery calculation

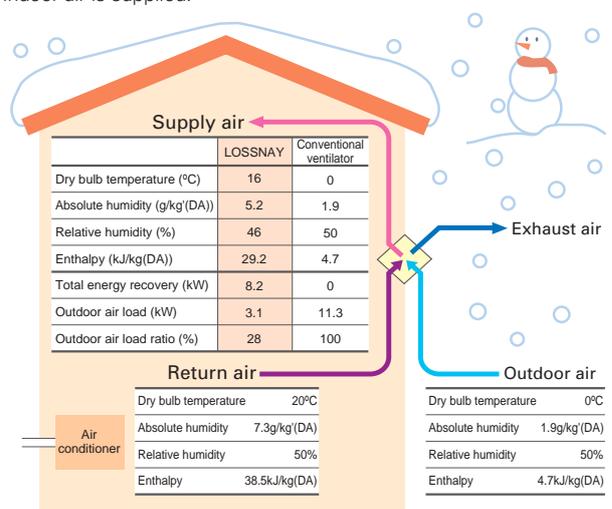

$$\text{Indoor supply-air temperature (°C)} = \left\{ \begin{array}{l} \text{Outdoor} \\ \text{temperature (°C)} \end{array} - \left\{ \begin{array}{l} \text{Outdoor} \\ \text{temperature (°C)} - \text{Indoor} \\ \text{temperature (°C)} \end{array} \right\} \times \text{Temp recovery} \right. \\ \left. \text{efficiency (\%)} \right\} + \text{Outdoor temperature (°C)}$$

Calculation example: 28°C = 33°C - (33°C - 26°C) × 71.5%

*The above applies to the case of LGH-100RVX (fan speed 4).

In winter

Air similar to the conditions of heated (humidified) indoor air is supplied.

Heat recovery calculation

$$\text{Indoor supply-air temperature (°C)} = \left\{ \begin{array}{l} \text{Indoor} \\ \text{temperature (°C)} \end{array} - \left\{ \begin{array}{l} \text{Outdoor} \\ \text{temperature (°C)} \end{array} \right\} \times \text{Temp recovery} \right. \\ \left. \text{efficiency (\%)} + \text{Outdoor temperature (°C)} \right\}$$

Calculation example: 16°C = (20°C - 0°C) × 80% + 0°C

*The above applies to the case of LGH-100RVX (fan speed 4).

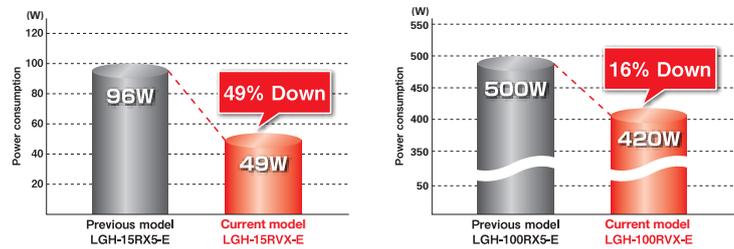

Commercial Use Lossnay

LGH-RVX Series (Standard model)

Power consumption reduced further with the introduction of a DC motor

Low power consumption is realised with the introduction of a high efficiency brushless DC motor. Compared to models with an AC motor, power consumption is reduced.

Comparison between current and previous power consumption
(Current model: Fan speed 4 at 230V 50Hz, Previous model: Extra-High at 220V 50Hz)

Improved airflow range

Wide airflow range

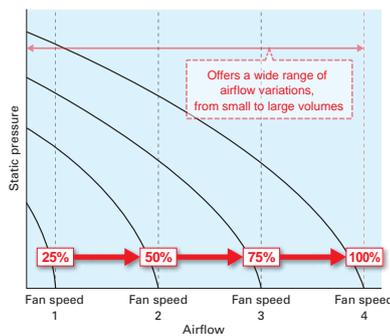

Each fan speed has a range setting of 25, 50, 75 and 100%, allowing much finer airflow control. When used in combination with the CO₂ sensor or timer function, airflow can be controlled according to conditions that realize better performance and reduce power consumption.

Fan speed adjustment function

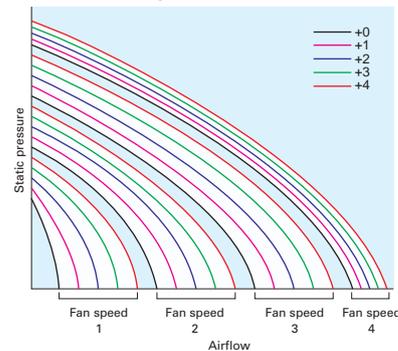

The default fan speed value can be adjusted slightly. Use the PZ-61DR-E remote controller to reset the speed.

- 1) Considering the total hours of Lossnay operation (filter clogging), fan power can be adjusted automatically after a given period of time.
- 2) After the unit is installed, fine adjustments can be made if the airflow is slightly lower than the desired airflow.

■ Characteristic curves of the LGH-RVX/RVXT Series

■ P-Q curve image

LGH-RVXT Series (Thin body type)

The LGH-RVXT series has a large airflow of 1500 - 2500 CMH but a thin body of approximately 500mm. Therefore, installing the unit in the ceiling is easy.

■ LGH-150/200RVX-E

Height: 808mm

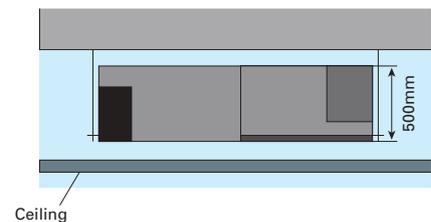

■ LGH-150/200/250RVXT-E

Height: 500mm

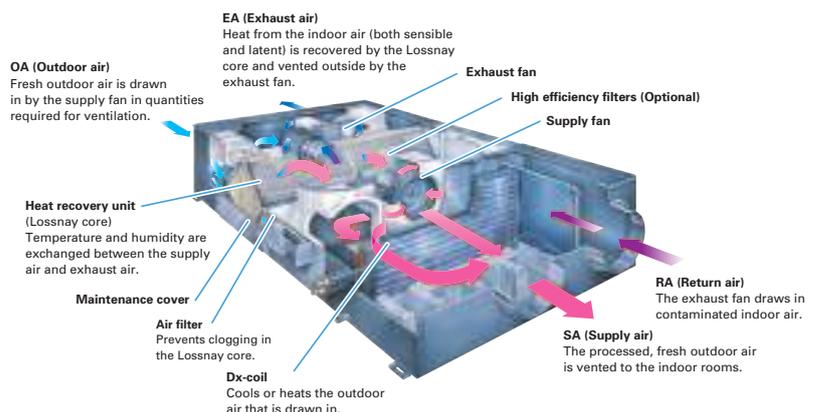

38% Thinner body

■ LGH-RVXT installation image

GUF Series (Lossnay with Dx-coil unit)

Along with Lossnay ventilation, the OA processing unit is really two units in one, functioning as the main air conditioner when the load is light and adding supplemental air conditioning when the load is heavy.
